

A Level summer transition project

Creative Digital Media Production

Colour in moving pictures

Using YouTube find a short film clip that uses colour to convey an emotion. Make notes on why that colour is used, how it contributes to the piece of film and whether using a different colour would change the meaning of the clip.

Sound in moving pictures

Using YouTube find a short film clip where sound makes up an essential part of the clip. Make notes on how the sound contributes to the piece of film, what the clip would be like if the sound wasn't there and how the sound creates meanings and messages.

Light in moving pictures

Using YouTube find a short film clip where light is used to add drama. Make notes on how the lighting affects the mood, whether it is natural or artificial light and what difference that makes and how the shadows produced add to the clip.

Bring your completed work to the first Media lesson in September.
